

Important Milestones: Your child at Four Years:

How your child plays, learns, speaks and acts will give you important clues about your child's development. Developmental milestones are things that a majority of children can do by a certain age.

Look at what your child has reached by his or 4th birthday and discuss this with your child's doctor next time you see them and find out what to expect next.

What most babies do at this age:

Social and emotional

- Enjoys doing new things
- Plays "Mom" and "Dad"
- Is more and more creative with make-believe play
- Would rather play with other children than by himself
- Cooperates with other children
- Often can't tell what's real and what's make-believe
- Talks about what she likes and what she is interested in

Language/Communication

- Knows some basic rules of grammar, such as correctly using "he" and "she"
- Sings a song or says a poem from memory such as the "Itsy Bitsy Spider" or the "Wheels on the Bus"
- Can say first and last name

Cognitive (learning, thinking, problem-solving)

- Names some colors and some numbers
- Understands the idea of counting
- Starts to understand time
- Remembers parts of a story
- Understand the idea of "same" and "different"
- Draws a person with 2 to 4 body parts

- Uses scissors
- Starts to copy some capital letters
- Plays board or card games
- Tells you what he thinks is going to happen next in a book

Movement/Physical Development

- Hops and stands on one foot up to 2 seconds
- Catches a bounced ball most of the time
- Pours, cuts with supervision, and mashes own food

Act early by talking to your child's doctor if your child:

- Can't jump in place
- Has trouble scribbling
- Shows no interest in interactive games or make-believe
- Ignores other children or doesn't respond to people outside the family
- Resists dressing, sleeping, and using the toilet
- Can't retell a favorite story
- Doesn't follow 3-part commands
- Doesn't understand "same" and "different"
- Doesn't use "me" and "you" correctly
- Speaks unclearly
- Loses skills they once had

If your concerned act early by telling your child's doctor or nurse if you notice any of these signs of being a possible developmental delay for their age.
